ADDICTION SERVICES REQUESTED

- Patients who are diagnosed with Opiate Use Disorder. This includes patients who are diagnosed with Opiate Use Disorder according to DSM 5 criteria. This includes both prescription opiates as well as non prescription opiates.
- Patients who have had a trial of other opiates for chronic pain and have developed unwanted side effects including Tolerance and/or Opiate Induced Hyperalgesia.
- Patients who have Contraindications for high dose opiates due to comorbid medical conditions and Suboxone could be a harm reduction strategy.
- Chronic Patients Diagnosed with Alcohol Use Disorder.
- Patients who have been found to have other substances in their urine (i.e Cocaine or Methamphetamine) And cannot be continued on Opioid prescriptions due to contract violation.

I have attached all relevant investigations and specialist reports.

I have asked the patient to take all their medications (not just a list) to their consultation.
